PROFESSIONAL EXPERIENCE

Google, Software Engineer Intern | New York, NY

Jun 2024 – Aug 2024

- Worked on [Privacy Sandbox, an open source project](#) to deprecate 3rd-party cookies on Chrome
- Implemented service mesh via proxyless gRPC to facilitate cross-network lookups within sharded server on the cloud, improving scalability and load balancing
- Added infrastructure, refactored server code, and added documentation, including design doc
- Evaluated performance of implementation by running benchmark tests and collecting and comparing latency metrics
- Utilized Terraform, C++, Google Cloud Platform, gRPC, xDS API, Git

Macy's, Starbucks Barista | Brooklyn, NY

June 2022 – June 2023

- Made and served drinks and food for hundreds of customers daily
- Communicated with customers to take orders, memorizing dozens of drink codes
- Maintained cleanliness and food supplies to support teammates' needs
- Collaborated with team in a fluid, mobile, fast-paced environment

Patch The Producer LLC, Software Developer Intern | Remote

May 2022 – June 2022

- Collaborated with front-end and full-stack developers as a back-end developer to develop company website
- Built and tested payment webpage utilizing Firebase, and Stripe

Freelance Graphic Designer | Remote

Sep 2014 - Apr 2016

- Established and maintained a freelance graphic design business on Roblox
- Designed and produced over 200 logos, advertisements, clothing, and thumbnails for individual and group clients
- Amassed over 13,000 pageviews on DeviantArt
- Utilized Paint.net, Blender, and Cinema 4D to create products

PROJECT EXPERIENCE

Personal website, Web Designer and Developer

Feb 2022 - Present

- Design and create portfolio website on GitHub pages
- Demonstrate creative variety by designing multiple versions of website
- Utilize HTML, CSS, and JavaScript to develop creative UI, using JavaScript to automate code

Bloons Tower Defense, Java Developer

May 2021 – Jun 2021

- Led development of a video game modeled on Bloons Tower Defense
- Utilized Processing (a Java-based program) to create complex code with a visually appealing output
- Oversaw front-end UI components in addition to developing back-end
- Applied Git and UML diagrams to coordinate with team

SKILLS

Coding Languages: Python, C++, Java, SQL, HTML, CSS, JavaScript, NodeJS, ExpressJS, Docker, UML, C, Terraform
